**A Bill to Ban the Sale of Military Equipment to Police Departments**

1   **SECTION 1.** Since the 1970s, riot police have fired at protesters using guns with rubber bullets or  
2   plastic bullets. Tear gas, which was developed for riot control in 1919, is widely used against  
3   protesters in the 2000s. The use of tear gas in warfare is prohibited by various international treaties  
4   that most states have signed; however, its law enforcement or military use for domestic or non-  
5   combat situations is permitted. Concerns about the militarization of police have been raised by both  
6   ends of the political spectrum in the United States, with both the right-of-center/libertarian Cato  
7   Institute and the left-of-center American Civil Liberties Union voicing criticisms of the practice. The  
8   Fraternal Order of Police has spoken out in favor of equipping law enforcement officers with  
9   military equipment, on the grounds that it increases the officers' safety and enables them to protect  
10   civilians. No longer will police be permitted to buy military equipment to service their departments.

11   **SECTION 2.** This includes the use of armored personnel carriers, assault rifles,  
12   submachine guns, flashbang grenades, grenade launchers, sniper rifles, Special Weapons and Tactics  
13   (SWAT) teams, intelligence agency-style information gathering aimed at the public and political  
14   activists, and a more aggressive style of law enforcement.

15   **SECTION 3.** The federal government will be in charge of ensuring these transactions do not take  
16   place.

17   **SECTION 4.** This will go into effect on June the 2<sup>nd</sup>, 2016.

18   **SECTION 5.** Any other laws in conflict with this policy shall hereby be declared null and void.

**A Bill to Decriminalize and Remove the Federal Ban on Marijuana**

1     **SECTION 1:** In the 1970s, many places in the United States started to abolish state laws and  
2     other local regulations that banned possession or sale of cannabis. The same thing happened with  
3     cannabis sold as medical cannabis in the 1990s. All this is in conflict with federal laws; cannabis is  
4     a Schedule I drug according to the Controlled Substances Act of 1970, which classified cannabis as  
5     having high potential for abuse, no medical use, and not safe to use without medical supervision.  
6     Multiple efforts to reschedule cannabis under the Act have failed, and the United States Supreme  
7     Court has ruled in United States v. Oakland Cannabis Buyers' Cooperative and Gonzales v.  
8     Raich that the federal government has a right to regulate and criminalize cannabis, even for medical  
9     purposes.

10    **SECTION 2:** This bill will remove such ban and allow not only medical but recreational marijuana  
11    to be taxed, sold, and used. This bill will also mandate that all possession or transfer of cannabis  
12    legal throughout the United States under federal law, including medical and industrial uses, through  
13    imposition of an excise tax on all sales of hemp. The tax will require a 10% increase on all  
14    hemp/cannabis products. This bill will also drop all charges and any form of criminalization of  
15    users and those who have possession of such products.

16    **SECTION 3:** This will be enforced by lower federal government agencies and the IRS.

17    **SECTION 4:** This will go into effect January 15, 2017.

6   change in our country.

8   Congress today shall enact the Trans Pacific Partnership.

10   this bill we can trade and broaden our horizons in the global market itself.

11   **SECTION 6:** The TPP will support well-paying American jobs for all to strengthen the middle  
12   class.

13   **SECTION 7:** The TPP helps improve conditions in TPP countries by eliminating forced labor  
14   and requiring laws on the time, quality and safety of the work for all.

15   **SECTION 8:** This bill hereby will enact that the TPP will be enacted in the United States to  
16   promote business and US economics so we may become involved with those markets on the Pacific  
17   rim. It is the absolute right thing we must do to promote economic sustainability.
